

Highlights of Second Quarter FY2020 Business Results

(Year ending March 31, 2021)

Contents

| I. | Summary of Results | 3 |
|------|---------------------|----|
| II. | FY2020 Forecasts | 9 |
| III. | Management Strategy | 12 |

I. Summary of Results

Sales, Income

| | 2Q FY2 | 2019 | | 2Q FY | 2Q FY2020 (Forecast) | | | |
|---|--------|---------------|--------|---------------|-------------------------|---------------|--------|-----------------|
| | Amount | % of Sales | Amount | % of Sales | Amount | Change (%) | Amount | Achieved (%) |
| Net sales | 16,097 | 100 | 14,832 | 100.0 | (1,265) | (7.9) | 33,000 | 44.9 |
| Pharmaceuticals | 15,745 | 97.8 | 14,569 | 98.2 | (1,176) | (7.5) | | _ |
| Others | 351 | 2.2 | 262 | 1.8 | (89) | (25.3) | | |
| Cost of sales | 9,219 | 57.3 | 9,446 | 63.7 | 226 | 2.5 | | _ |
| | | | | 6.4p | | | | |
| SG&A expenses | 6,257 | 38.9 | 5,575 | 37.6 | (682) | (10.9) | — | — |
| | | | | (1.3p) | | | | |
| Operating income/loss | 619 | 3.9 | (189) | _ | (809) | _ | 600 | _ |
| Income/loss before income taxes and minority interests | 513 | 3.2 | (346) | | (860) | | | _ |
| Net income/loss attributable to owners of the parent | 326 | 2.0 | (257) | | (583) | | 300 | _ |

Reason for Rising Cost of Sales Ratio

- Up 9.5 percentage points on NHI price revisions in October 2019 and April 2020.
- Reducing manufacturing costs: Changing to high quality and inexpensive APIs, reducing the cost of products purchased.
- Sales mix: Increasing in ratio of high-profit products.

We expect percentage-point rising in cost of sales ratio will be down by the third quarter thanks to sales of new product which we launched this year.

Pharmaceutical Sales

III. Management Strategy

Three Plus 1 Principal Goals

Overview

Business strategy by Three Principal Goals

- By fulfilling our three principal goals, we will establish a proprietary business model.
- To make that growth sustainable, we are expanding our business internationally.

Goal 1: Generics

Develop unique business by differentiating our products and enhance cost competitiveness.

Goal 2: Alkalizer

Apply the results of clinical research on alkalization therapy to the fullest extent possible.

Goal 3: Drug discovery

Simultaneously reduce risk, improve drug discovery efficiency, and launch new drugs on a global scale by focusing on exploratory research and out-licensing our findings at an early stage.

Plus 1: Apply our three goals to overseas markets centered on Asia

Management Strategy

We are developing a multi-faceted strategy for expanding our Pharmaceutical Products business that is grounded in our three plus 1 principal goals.

| Our Growth Matrix | | | | | Dru | ıg discovery | From manufa | cture to sale of pha | rmaceuticals |
|--|--|---|---|--|--|--------------------------|---|---|--------------|
| Existing product | | | | | | New product | | | |
| | | Existing technol | logy | | | | New te | echnology | |
| Present field of Present market | | Implementation of structural reforms within our generics business Improvement in Group-wide productivity and profitability enhancement. | | | Introduction of new products (new and long-listed drugs) Development and stable supply of valuable products through appropriate life cycle management. | | | | |
| Present field of R&D Present market | | Strengthening and streamlining of supply characteristic costs through use of the Vietnam factory and expansion of insourced | | | | DropScreen TM | allergy screen ; joint marketing Chemical Corpo | in Japan with pration. | |
| | | manufacturing at both domestic and overseas factories. Export We are currently selling five products (proprietary products and generic drugs), in three countries. | | | Drug discovery Expansion in scope of drug discovery to include drugs related to the central nervous system while focusing on treatments for hyperuricemia and pain; preparation for phase 1 clinical trials concerning NC-2800; crucial stage for out-licensing activities | | | | |
| New field of R&D New market | | Overseas rollout of allergen measuring devices Out-licensing DP3000 to Chinese | | | | | t of efficient clin | new technologies ical development usi ques and real-world | ng new |
| et et | | company and collection of royalties. Drug repositioning New indications for Soleton and Calvan | Alkalizer Consideration Development of anticancer agents, promotion of clinical possibilities relate research aimed at inhibiting the progress of chronic kidney the digital medi disease, application of findings to health foods, etc. technology busin | | | | elated to edical | | |

Structural Reforms in Generic Business

We implement Group structural reforms aimed at responding to rapid changes in business environment and converting to a business structure that will achieve sustainable growth in all environments.

Summary of structural reforms

| Development | Shift focus of development from large-scale products to value-added drug formulations. (Products used in clinical environments, niche products, and products related to patent strategies.) |
|-------------|--|
| Manufacture | Reduce cost of sales by expanding production at the Vietnam factory and cutting manufacturing costs through the addition of high-quality and affordable APIs from overseas while securing stable means of supply. |
| Sale | Excerpt from July 22, 2020 news release titled Notice of structural reforms to the Nippon Chemiphar Group Established a Group Pharmaceutical Sales Headquarters that centrally supervise pharmaceutical sales divisions within both the Company and its subsidiary NPI*. *Nihon Pharmaceutical Industry Co., Ltd We eliminated and consolidated domestic bases to maximize the effectiveness of our efforts to restructure pharmaceutical sales organization on a Groupwide basis. (8 branches, 22 sales offices → 7 branches, 18 sales offices) |
| | With the goals of adapting to new, post-COVID-19 workstyles and improving the productivity of our corporate activities, we will invest to drive digital transformation. Offered early retirement packages to eligible employees as part of our efforts to optimize the organization of our staff. 42 employees retired at the end of September. |

Development of New Applications for Alkalizer

We are conducting multi-faceted development using technologies and expertise related to alkalinization that we cultivated over many years through our involvement with urine Alkalizer.

For pharmaceuticals

Licensing agreement of anti cancer agent

We concluded a licensing agreement for DFP-17729 chemical agent with drug discovery venture Delta-Fly Pharma, Inc. Formulated to improve cancer microenvironments, DFP has started clinical tests on pancreatic cancer patients.

Promote clinical research for preventing progress of chronic kidney disease

We are currently utilizing AI and clinical data to conduct additional analysis of results generated by the CKOALA study conducted at Tohoku University, which focused on the renoprotective effects of oral alkalizers in patients of chronic kidney disease. We expect to be presented the results of these analyses at conferences within FY2020 at the earliest.

Investigation regarding possible applications in functional foods and health foods

Based on research data and our expertise regarding alkalization therapy, we are also developing functional foods with domestic food manufacturers.

Pipeline

| In-house drug development | | Other companies or physician-initiated development | | | | | |
|---------------------------|---|--|---------|---------|---|--|--|
| Item | Function (Target) | Pre- clinical | Phase 1 | Phase 2 | Notes | | |
| NC-2400 | PPAR-δ agonist (Lipid metabolism abnormalities) | | | | Finished Phase 1.Licensed to Abionyx Pharma SA (France). | | |
| NC-2500 | XOR inhibitor (Hyperuricemia, gout) | | | | Phase1 was finished and we are conducting licensing out activities. Explored possibilities for applications as a treatment for neurodegenerative diseases. | | |
| NC-2600 | P2X4 receptor antagonist (Neuropathic pain) | | | | Phase 1 was finished and we are conducting licensing out activities. Also began out-licensing for application as a treatment for chronic coughing. | | |
| NC-2700 | URAT1 inhibitor (Hyperuriceia, gout) | | | | •Finished preclinical trial and we are conducting licensing out activities. | | |
| NC-2800 | δ opioid receptor agonist (Depression/Anxiety) | | | | Selected by AMED for its funding program on January 2018. Conducting licensing out activities in parallel with phase 1 preparation which we plan to start in FY2021. | | |
| DFP-17729 | Cancer microenvironment improving agent (Pancreatic cancer) | | | | Developed by Delta-Fly Pharma, Inc. The PMDA concluded its pre-clinical trial reviews and evaluations; phase 1 trial was started. | | |
| Soleton | COX inhibitor (Diffuse-type tenosynovial giant cell tumor and others) | | | | Physician-initiated clinical trial was started. Achieved the objective number of trial participants and plan to conduct data analysis. | | |
| Calvan | A1β1 blocker (Huntington's disease) | | | | Licensed to SOM Biotech SL (Spain).Finished phase 2a trial. | | |

Introduce new technologies for drug discovery

We formed capital and business tie-ups with MOLCURE Inc. in November 2018, and SUSMED, Inc. in August 2020, with the intention of utilizing AI and other new technologies to raise the reproducibility of drug discovery theme creation, accelerating associated processes, and improving efficiency. Meanwhile, we are expanding collaboration associated with several specific themes.

Collaboration with partners expected to speed up and streamline drug discovery processes

Diagnostics in allergy screening field

We have begun to consider an overseas rollout of DropScreen[™] as we strive to expand its application within the domestic market. Additionally, we have begun collaborating with local partners as we promote allergy testing reagent Oriton IgE Chemiphar[™] in China.

Launched allergy screening kit Drop ScreenTM in Japan

- Breakthrough measuring equipment that is capable of screening blood samples taken from fingertips for 41 allergens within 30 minutes.
- •We received a favorable volume of inquiries from medical institutions considering implementation of the system despite restrictions placed on informative activities by the COVID-19 pandemic.

DropScreenTM measureing device A1

Rollout of IgE NC in China

IgE NC

- Additional reagents received approval and corresponding promotional activities have been launched.
- We provide core components and technologies to indigenous companies attempting to localize their production and earn royalty income commensurate with sales revenue.
