

FY2022 First Quarter Business Summary

(Year Ending March 31, 2023)

Highlights

Sales

Despite the impact of NHI drug price revisions, our generics sales were up 10.8% YOY due mainly to ongoing response to demand stemming from quality issues encountered by other companies that manufacture and sell generic drugs and strong sales of recently launched generic drugs. Sales of proprietary products and new drugs declined 29.1% YOY due to the impact of NHI drug price revisions.

Diagnostics sales were up 30.1% YOY thanks to steady growth in the performance of DropScreen™.

Consequently, sales generated through the pharmaceutical products segment amounted to ¥8,214 million (up 11.3% YOY).

Sales in the others business segment came to ¥210 million (up 6.6% YOY) thanks primarily to strong order acquisition achieved through

subsidiaries performing contracted non-clinical and clinical testing services.

Accordingly, consolidated net sales came to ¥8,425 million (up 11.2% YOY).

Profit

Despite a higher cost of sales ratio stemming from NHI drug price revisions, we recorded ¥175 million in operating profit (versus an operating loss of ¥26 million in first quarter of FY2021) thanks to an increase in sales. Ordinary profit amounted to ¥514 million (versus ¥15 million in first quarter of FY2021) due mainly to foreign exchange gains.

Meanwhile, profit attributable to owners of parent finished at ¥653 million (versus ¥13 million in loss attributable to owners of parent in first quarter FY2021) due to sale of

investment securities.

Both ordinary profit and profit attributable to owners of parent exceeded corresponding projections included in the full-year forecast we released on May 26, 2022.
